

The Benefits of
PVC Cling Film

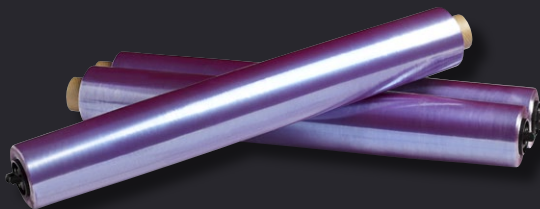

Cofresco Foodservice, brand owner of Wrapmaster®, takes its corporate, social and environmental responsibilities very seriously. Having worked with chefs for over twenty years we recognise that sustainability and waste management are key focus areas for the foodservice industry.

The materials used to manufacture our range of PVC cling films are authorised and listed in EU Regulation 10/2011 concerning plastic materials for food contact and pose no danger to public health or the environment. Migration is at levels considered totally safe and fall well within EU/UK regulations.

Our PVC cling film is specially designed for catering use. It is suitable for all food wrapping except pure fats, oils and food stored in an oily medium, and can be used in the fridge, freezer and microwave.

Cofresco Foodservice and our suppliers comply with all relevant EU/UK plastic regulations as well as local legislation. Our products and supply of products are routinely tested to ensure compliance with local and national regulations. We and our suppliers are committed to ensuring that we never use controversial phthalate plasticisers.

.....

The UK's hospitality and foodservice sectors are wasting one million tonnes of food per year.[^]

Cling film provides a positive solution by helping to preserve food and improve shelf life.

.....

The Benefits of PVC Cling Film are Clear:
